

Any Size, Any Shape, Any Where, Any Time

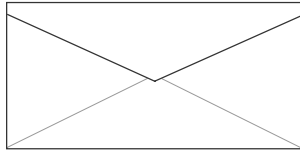

[OPTI]TM Trilite

Custom components, structures and fabrications

Custom Design

Taking a project from an initial sketch on the back of an envelope with a rough idea of budget to a finished structure is all part of the FREE DesignLine service.

Simply send, e-mail or fax details and we will take it from there. Rapid response drawings, components lists, on budget costings, manufacture, coating and delivery.

Custom Curves and Spheres

Curves and spheres to any size to suit any where.

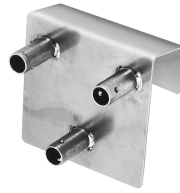

Custom Junctions

As well as the standard range of 57 junctions for ladder, triangular and box formats OPTI can custom make junctions for any application.

Custom Accessories

As well as the extensive standard range OPTI also specify a wide range of custom accessories. Special connections to attach display items to the main tubing, channelled extrusions to hold panelling and hook-over wall plates (right) are just some of the custom possibilities.

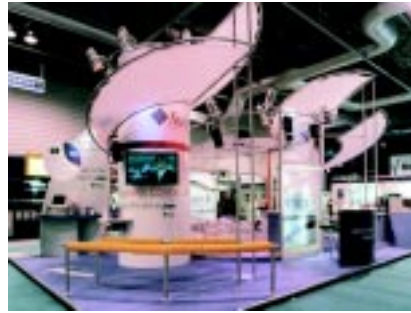

Custom Outdoors

The durability of OPTI Trilite enable it to be used almost anywhere. Like this installation for spectacular diving acrobatics.

Custom Single Tubing

Rather than using truss construction, sometimes, single tube structures and components can be extremely effective.

Custom Colours and Finishes

OPTI Trilite is available in a wide variety of custom finishes to suit your application. A wide range of powder coatings as well as stunning polished and metallic colours are just some of the many options.
